Experience/Projects

EASY MY STORAGE   **june 2025 – present**
Full Stack Development (Internship)   *Delhi, India*

- Working on building a secure **admin dashboard** to give company staff access to all customer and warehouse data.
- Developing a **customer-facing portal** where users can log in to view their own details, pickup schedules, and payment status.
- Integrating **Razorpay** for payment processing to enable seamless and secure online transactions.
- Improving the company's existing website from **both frontend and backend,** including layout redesign, better user experience, and performance optimization.
- Using **HTML, CSS, JavaScript, PHP, and MySQL** across the project to ensure consistency and efficiency in development.

Personal Projects/Awards & Achievements

Smart Farming Web Platform | Web Application Development, API Integration, UI/UX Design

- Developed a full-stack web platform to educate farmers on lesser-known agricultural practices, enhancing knowledge access and practical adoption through expert-led courses.
- Integrated expert profiles, raw material listings, and course purchase options, enabling a seamless learning and e-commerce experience for users.
- Streamlined the user interface for both farmers and experts, improving platform usability and increasing engagement with farming content and expert offerings.
  Stack: HTML, CSS, JavaScript, PHP, MySQL

Taskify – Employee Management System | Web Application Development, Database Design, UI/UX

- Developing a full-stack web application to streamline employee and task management within an organization.
- Designed and structured modules for managing departments, tasks, and individual employee records through a centralized admin interface.
- Implemented CRUD operations for each module with role-based access, ensuring secure and efficient data handling
  Stack: HTML, CSS, JavaScript, PHP, MySQL

Hackathons & Leadership Experience

- **Participant in 10+ Hackathons –** Including BVP-HEX, HackWithMait 5.0, HackCBS 7.0, Matrix 2.0, Code Kshetra 1.0 & 2.0, Code Nakshatra, HackItUp.
- **Core Member, GEEK Room (June 2024 – March 2025) –** Assisted in planning, coordinating, and executing multiple campus-level hackathons and coding challenges.
- **Core Graphic Designer, NEXVERSE (March 2025 – Present) –** Led creative design for promotional campaigns, event posters, and UI mockups for various tech/non-tech events.
  Event Coordinator, Celestia 1.0 – Managed event branding, coordinated design teams, and contributed to cross-functional event execution.
